**DARK WALNUT**

**ROSE WALNUT**

**BLEACHED WALNUT**

**CONCRETE**

In line with the one of the latest emerging kitchen trends, Otto is now extended to include four stunning new finishes.

The three new woodgrain finishes of Dark, Rose and Bleached Walnut offer an incredibly accurate representation of real wood, encapsulating the intrinsic woodgrains and tactile appeal of real timber, in a high quality laminate finish. Aligned to the popular warehouse style aesthetic, the Concrete finish is also a clever representation of this architectural building material, fulfilling the demand for a raw, edgy look that is so appealing for designs embracing the industrial trend.

Designed and manufactured in the UK, we are able to produce special sized doors as well as the standard range of sizes in the Otto range. This invaluable tailored service allows for bespoke design, eliminating the need for any unsightly fillers or awkward corners in your kitchen plan. Coupled with the ability to mix and match these beautiful

finishes with the full palette of Gloss, Matt or Painted colours, this range offers true creative freedom for your kitchen design.

Completing the look, these four laminate finishes are available in an extensive range of new accessories, including a selection of different thickness worksurfaces and splashbacks. Using the same stunning laminates these hard wearing tops, upstands and splashbacks can be co-ordinated with the doors to create a unified scheme so desirable in contemporary kitchen design.

Finally, to echo the bold modernity of European styling Otto also boasts the option for a true handleless look. Designed for the discerning, an ingenious integrated handle rail, fitted into the cabinetry provides plenty of room behind the door to open it. The resulting true handleless kitchen design is streamline with crisp angles, that highlights these stunning new finishes and the whole Otto range perfectly.

## DARK WALNUT

The rich and intense shades  
within this finish are stunning  
whilst the subtle texture  
has tactile appeal.

 **MADE IN THE U.K.**

5

## **DESIGN PRESENCE**

Create a kitchen design with presence. Use a luxurious combination of rich Dark Walnut and the smoky tones of Mink with just a touch of Concrete for that industrial edge.

**INSET LETTERBOX HANDLE K168**

## **GET A HANDLE ON IT**

Every detail matters when it comes to specifying your kitchen with handles now a style choice rather than a necessity.

8

### **INSET HANDLES**

The tasteful inset letter box handle is an alternative on-trend look which suits the slab doors perfectly. Uniformly inset into the face of each door for a bold style statement, spring loaded in a brushed aluminium finish, the inset handle marries functionality with design.

### **HANDLELESS RAIL SYSTEM**

For a smooth, seamless aesthetic consider a true handleless kitchen. Discreet handle rails fit into the cabinetry and locate behind the door, giving an uninterrupted, sleek finish to your design.

## DESIGN SCOPE

Create a co-ordinated kitchen scheme, where worktops, handle rails and frontals are all perfectly matched.

## **BLEACHED WALNUT**

Simple designs are given added appeal with this material, which combines fabulously with many of the Otto finishes.

## SCANDINAVIAN CHIC

Modernity meets tradition with the rustic accent of Bleached Walnut creating warmth in an otherwise minimalistic and cool atmosphere.

19

## SUBTLE STYLING

This cool combination of Bleached Walnut and premium quality lacquered White Gloss doors captures the crisp and clean trend of Scandinavian chic. Adding to the modern mood of this kitchen is the handle free design. Beautifully engineered, the true handleless system is a key look with a simplicity that really accentuates the beauty of this new woodgrain. White rails match the kitchen door and fade into the background to continue the subtle styling so key to the success of this aesthetic.

## **WORKSURFACES**

Whether slim and sleek or luxuriously deep, the right worksurface will help define your kitchen design.

**BLEACHED WALNUT 50MM WORKSURFACE**

## **WORKSURFACES, SPLASHBACKS AND UPSTANDS**

Unify your kitchen design with matching laminate worksurfaces, splashbacks and upstands. The worksurfaces are available in all four finishes and in a range of different thicknesses; 22mm, 38mm and 50mm with a contemporary, square edge profile. These eco-friendly, high pressure laminate worksurfaces are tougher and thanks to advances in print technology, better looking than their predecessors.

The matching worksurfaces open up greater possibilities in design, making it possible to harmonise colour schemes as well as zone and homogenise your space.

CONCRETE 720MM OPEN UNIT

**BLEACHED WALNUT 360MM OPEN UNIT**

## **BALANCING ACT**

Balance beauty with practicality with these differently sized open units, available in all four of the new finishes.

## FINISHING TOUCHES

The appeal of the handleless design is that it is pleasing to the eye but also makes for a functional, uncluttered kitchen. Extend this functionality with high specification drawer boxes and storage solutions. Blum's innovative Legrabox drawer boxes and Ambia Line cutlery trays are the quality finishing touches that will make a real difference to the feel and performance of your kitchen.

CONCRETE INTERNAL DRAWER FRONTS

## FINISHING TOUCHES

Maximise storage with a space tower, an attractive solution that allows you to neatly hideaway everyday items and boasts up to three times the load capacity of that of wirework. For added detailing, fit the space tower with colour matched internal drawer fronts.
